

POWER, SIMPLIFIED.

ToolBook Assistant 9 lets non-technical users create engaging training and interactive content quickly easily and economically. Drag and drop authoring ensures ease of use, eliminates the need for any programming and facilitates high authoring productivity. Just point, click and drag objects.

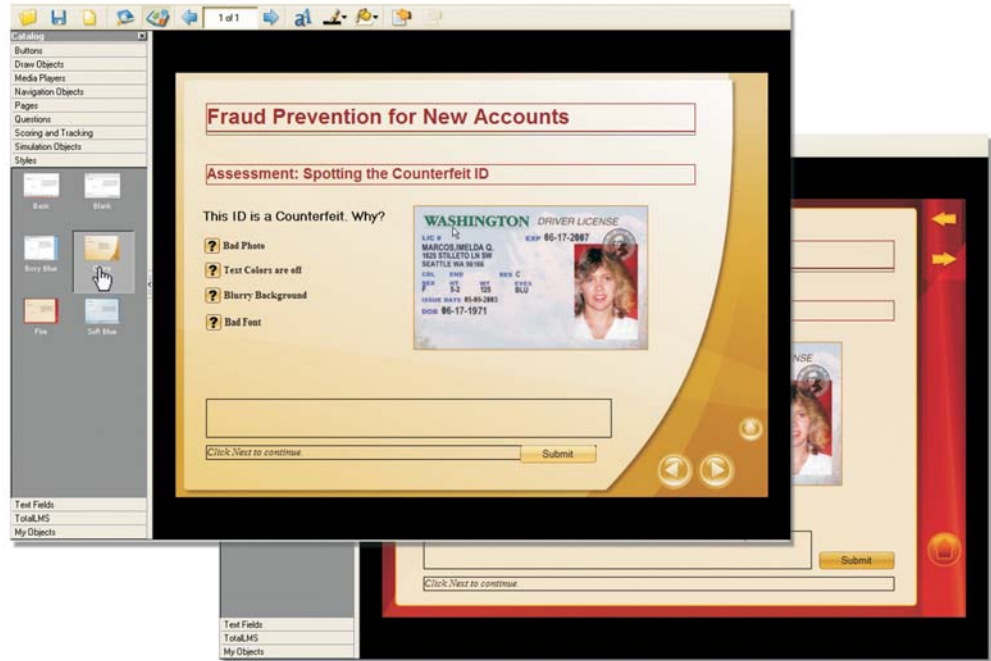

FAST AUTHORING

The new Book Explorer gives you more information and better control when working with your content. The Explorer provides fast and easy access to all pages, objects and backgrounds simplifying the way you work with your content. In the Explorer view, you can quickly edit, move, delete, copy and perform numerous authoring activities.

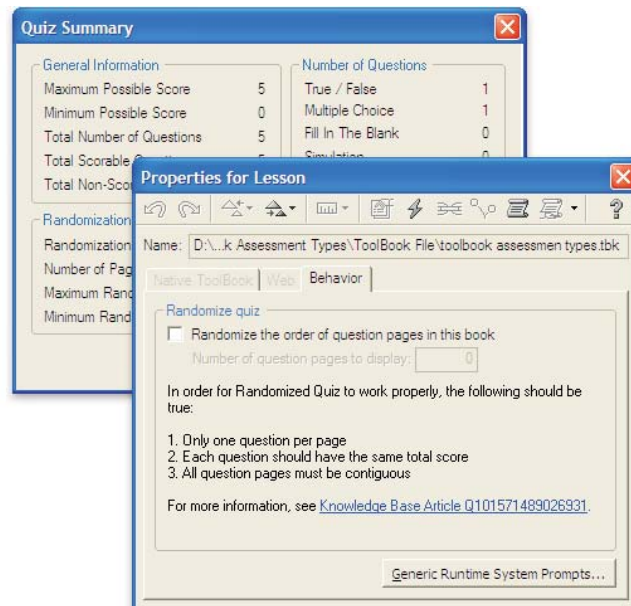

GET STARTED QUICKLY

With the new SmartPages, you get all the course page types found most often in professional e-learning courses, with interactivity and functionality already built in. The new SmartStyles gives you the professional look you want for your course. Create your own SmartStyles to ensure all your content has the same look and feel.

EASILY INCORPORATE ASSESSMENTS

ToolBook Assistant has more than ten assessment object types - true/false, multiple choice, drag and drop, match item, essay, and more - that test users on their understanding of your content. These objects have built in behavior that provides feedback to your users and supplies you with information about how your users respond to these questions. Plus, with the ability to randomize questions and answers, you can perform secure testing.

ToolBook[®] ASSISTANT[™] 9

INTEGRATES THE LATEST TECHNOLOGIES AND STANDARDS

Supports Microsoft Vista and deployment over Internet Explorer 7 - in addition to Firefox and Mozilla - provides both your authoring team and your learners with more options. You can incorporate Windows Media Player 9 and the latest Adobe Flash functionality into your designs.

MULTIMEDIA AT YOUR FINGERTIPS

Use ToolBook Assistant's rich multimedia capabilities to keep learners engaged. With WYSIWYG drag-and-drop functionality, it's easy to include images, animations, video, audio, text, and more in your lesson or course. You can even incorporate PowerPoint and Word documents, or add Flash movie files.

STANDARDS SUPPORT FOR LMS INTEGRATION

ToolBook supports SCORM and AICC, making it easy for you to use the lessons you create as part of a total e-learning solution. You can deliver the content using SumTotal Enterprise Suite or any standards-based learning management system. You can also deploy content developed in ToolBook on the Internet, an intranet, a local area network (LAN) or CDROM.

EXPANDING THE POSSIBILITIES WITH TOOLBOOK INSTRUCTOR

You can enhance the authoring capabilities of ToolBook Assistant by using its companion product, ToolBook Instructor. ToolBook Instructor allows you to create tools for enhancing the productivity of ToolBook Assistant authors. Using ToolBook Instructor, you can create custom objects and templates for use in ToolBook Assistant. You can then use these customized objects and templates throughout your organization to produce the same type of courses.

Delivery

- HTML
- CD-ROM
- EXE

Content Creation

- Interactive content
- Assessments
- Compliance training content
- Soft skills training
- Sales training
